

# HG "impregnator"

A DURABLE LIQUID PROTECTOR  
PROTECTS FLOORS FROM STAINS AND STUBBORN MARKS  
ALLOWS THE SURFACE TO BREATHE

- APPLICATION

For terra cotta tiles, bricks and natural stone. For inside and outside use.

- DIRECTIONS FOR USE

The surface to be treated should be perfectly clean and absolutely dry. Remove cement and grout stains with HG "extra". Remove grease, dirt and old layers of wax with HG "remover". After rinsing-off allow at least 3 days for the surface to dry. HG "impregnator" is used neat. Apply evenly by brush, spray or non-fluff cloth. Leave for a maximum of 5 minutes to penetrate. After treatment the surface should retain a mat appearance. Any surplus resting on the surface (leaving a gloss finish) after this time must be removed with a cloth dampened with white spirit if necessary. Allow 2 hours before applying a second or more coats. After approximately 4 hours the surface can be walked upon. Exterior stone or brick walls require no further treatment. Clean tools with white spirit. Once dry HG "impregnator" can only be removed with HG "spot stain remover".

- PRODUCT INFORMATION

Characteristics	: a durable liquid protector.
S.G.	: ± 0.8 g/ml
Flashpoint	: 40°C
Usage	: 8-10 m <sup>2</sup> /L (5 m <sup>2</sup> /L. for 2 treatments)
Active matter	: 12%
Components	: aromatic hydrocarbons, aliphatic hydrocarbons, polymers

<u>PACKAGING</u>	: 6 x 1.0 L
	4 x 5.0 L

- PRECAUTIONS
